

ESDO Eco-Tourism Website

Community-Based Sustainable Tourism Platform

Scan to visit

Project Overview

A fully functional eco-tourism website built for ESDO (Environmental and Social Development Organization) to promote sustainable, community-based tourism in northern Bangladesh. The platform showcases the region's natural heritage, cultural landmarks, and agro-tourism opportunities — connecting conscious travelers with authentic local experiences.

Key Features

- Dynamic blog system — 14+ articles on heritage, culture, agro-tourism, and experiential travel
- Responsive design — optimized for mobile, tablet, and desktop
- Community-first approach — highlights homestays, local guides, and village-level experiences
- SDG-aligned — supports UN Sustainable Development Goals through responsible tourism
- Category filtering & search — visitors can browse by topic and find relevant content
- Rich article layouts — narrative storytelling with images, callouts, and structured sections

Tech Stack

- Node.js + Express.js — Server-side routing and rendering
- EJS Templates — Dynamic page generation with reusable components
- Vanilla CSS — Mobile-first responsive design with media queries
- JSON Data Layer — Structured content management for blog posts
